

Researchers at Iowa Communication, Memory, and Mind lab (ICOMM) in the Department of Communication Sciences and Disorders at the University of Iowa are looking for participants for a research study. The purpose of this study is to better understand language production in adults with and without autism spectrum disorder.

- **Participants invited: Healthy adults with a diagnosis of autism spectrum disorder**
- **Eligibility: All participants should be** native speakers of English. Participants should be between 18-50 years old.
- **Study participation involves:**
  - 1 session, in which you will complete a communicative picture description task.
  - The session will last about 30-45 minutes.
  - Sessions will be completed online using a video communication platform.

We are happy to discuss any further questions or concerns that you may have about the study. For further information or to participate, please contact
